Gianfranco Casetta

Infrastructure Specialist

DevOps and Cloud Engineering on AWS

A solid team is built by showing up for one another: what you give today is what holds each person up when the challenge arrives. I come from datacenter field support and now work on AWS infrastructure. I trust the people and the plan behind each project, technical debt included: sorting it out together is part of the job and part of growing. I care about solving things well once, with reusable solutions, so the same work isn't done twice.

Work experience

Infrastructure Specialist

Prex May 2024 – Present CABA, Argentina

- Part of the infrastructure team behind 50+ repos, one stack per country, with a hand in maintaining the shared **CI/CD** repo and its backend (Bitbucket Pipelines for Python, SageMaker and Terraform).
- Terraform **change management** automated as a team: plans and applies logged on the Jira ticket, approvals synced with the pull request, and security and audit checks built in, with no manual steps.
- Infrastructure and release flow for a real-time **fraud scoring** model on SageMaker, a joint project now heading to production.
- Maintenance automated with **Rundeck and Ansible**: ALB traffic shifting, instance snapshots and unattended Ubuntu patching.
- Moving services from EC2 hosts to **EKS** pods together with the SRE team.
- Day-to-day operation of core AWS (EC2, ALB, IAM, VPC, CloudWatch) and a Windows Server domain controller, troubleshooting in **Datadog** and Tenable scans under **PCI-DSS**.

Infrastructure Field Support

VR4 Oct 2022 – Apr 2024 CABA, Argentina

- On-site part replacement for **NetApp** systems (disks, motherboards) as part of a NetApp partner's field team.
- Remote IT infrastructure support for small and mid-size clients, on their VPS or on servers through iLO.
- Follow-up on client projects: on-prem to **cloud migrations**, storage mirroring and MetroCluster.

Software-Defined Datacenter Field Support

Wetcom Jan 2021 – Oct 2022 CABA, Argentina

- **VMware** operations for a pod of about 10 clients: ESXi host and VM lifecycle in vCenter, plus some vSAN.
- VM and datastore backups kept running in **Veeam B&R**, fixing the causes of warnings and errors.

Education

High School Degree in Information Technology
Instituto Leonardo Murialdo · Villa Bosch · 2013 – 2019

Skills

Cloud and IaC

AWS · EKS · SageMaker · Terraform · IAM · VPC

CI/CD and automation

Bitbucket Pipelines · Git · Jira automation · Rundeck · Ansible · MLOps

Systems and containers

Ubuntu · Docker · Kubernetes · Windows Server · Active Directory

Security and monitoring

Tenable · PCI-DSS · Datadog · CloudWatch · Pipeline security checks

Datacenter

VMware vSphere · vSAN · NetApp · MetroCluster · SAN / NAS · Veeam B&R

Certifications

AWS Certified Cloud Practitioner
AWS · Nov 2023

NetApp Certified Storage Installation Engineer
NetApp · Oct 2023

NetApp Certified Technology Associate
NetApp · Jul 2023
